

Problem: I've just installed MS Small Business Server and among all other problems, the server does not send out emails right away

Solution: This happens because MS SBS exchange by default sends out emails every hour. To fix this problem, do the following:

1. Open **Exchange System Manager**
2. Expand the following: **Administrative Groups** > **first administrative group** > **Routing Groups** > **first routing group** > **Connectors**
3. Right click on "**Internet Mail SMTP Connector**"
4. Under "**Delivery Options**" tab, make sure that "**Specify when messages are sent through this connector**" is checked
5. Under "**Connection time**" select "**Always Run**"
6. Click "**Ok**" and close all other windows

MS Exchange does not send out right away
